

**Accelerate
Green**

Accelerate Green

Bord na Móna has a proud history of providing sustainable employment to the communities we operate in. We want to continue this tradition as a climate solutions company by partnering with leading companies and organisations to develop new approaches for climate action.

Bord na Móna, have collaborated with leading Irish innovation advisory firm Resolve Partners, to develop Accelerate Green, the first scaling accelerator programme in Ireland to focus on a sustainable transition to the green economy.

Accelerate Green brings together Bord na Móna's organisational and commercial expertise in transitioning to a climate solutions organisation, and Resolve Partners unparalleled expertise in building and advising innovation companies that scale. Accelerate Green offers participating companies the necessary tools, advice, mentoring, and community of expertise that will allow them to understand the opportunities of transitioning to a green, and low carbon economy, and how to overcome the obstacles that prevent scale.

The areas of focus underpin Accelerate Green's 'triple bottom-line' approach, of:

- ☀️ **Accelerating impactful scale-ups & SMEs whose innovations drive the transition to a carbon zero economy;**
- ☀️ **Stimulating a vibrant enterprise ecosystem, supporting sustainable, high-value employment opportunities in the Midlands region.**
- ☀️ **Supporting high potential growth-driven companies whose innovations have potential to scale nationally and internationally.**
