

Kilkenny Cycling Tours

A meandering way of visiting Kilkenny...

blaa blaa blaa
sandwiches

**Kilkenny Cycling Tours (Office), Unit 3A, Castle Yard, Kilkenny Design Centre.
Depot: Bateman Quay, Kilkenny City, R95 F763**

When Jason Morrissey found himself out of work after the collapse of the construction industry he came up with the idea of providing a cycling tour of Kilkenny to visitors and tourists alike. The tour which covers 12 kilometres and takes approximately 2 hours to complete includes visits to landmark attractions such as Kilkenny Castle, Rothe House, The Black Abbey and Saint Canices Cathedral, to name but a few, and provides visitors an organised tour of Kilkenny in a way that hitherto was not available.

The tours are largely bespoke orientated and can commence from the users place of accommodation or from a pre-arranged location in the city centre. With two tours per day the price is very competitive and includes all safety gear requirements and appropriate attire to deal with the sometimes inclement Irish weather.

Local Enterprise Office Kilkenny provided Kilkenny Cycling Tours with a Priming Grant and a Mentor to assist with the implementation of the project.

This environmentally friendly addition to Kilkenny's tourist industry has received commendable feedback from the many tourists who have availed of the service as a super fun way of experiencing the beautiful sites and surroundings of Kilkenny.

Indeed, in recent years Kilkenny has developed a series of traffic free walkways that have complimented Kilkenny Cycling Tours daily excursions, which guarantees tour participants a peaceful, safe and serene view of the delights that the city has to offer. With specialised equipment such as tow along bikes and childrens carriages, and other service offerings such as fully stocked picnic baskets, the service can provide a fun day out for entire families or the more romantic at heart.

Futhermore, as a committment to participate in conveying the message of safer cycling, Kilkenny Cycling Tours also participates in the delivery of a cycling safety programme under the title of Southeast Cycling Safety during the months from September to June in south Leinster and east Munster which has enabled Jason to employ another person during the peak season.
